

Hot Micro Perforator

| | |
|-----------------------------------|---|
| Machine Type | HPM-200 HOT MICRO PERFORATOR |
| Working Width | Up to 2000mm as standard |
| Perforating Roller | Core 90mm Perforating sleeves as per requirement |
| Pressure Roller | Tight wind Tampico fibre brush |
| Temperature control | External high performance medium wavelength infrared panel heaters Heating up to 18kW per meter Automatic heat shield protection system HT Sensor c/w LED temperature display module |
| Working Temperature | Up to 400°C (measured at pin tip) |
| Depth Adjustment | Pneumatic control with precise adjustment and display |
| Drive system | Control panel with HMI touch screen 0.75Kw AC Motor Web break detector |
| Typical External Dimension | Length: working width + 1900mm Height: 800mm (approx) Depth: 500mm (approx) |
| Insulation | Ceramic insulation system Complete with insulated handles |
